

LAKE BORGNE BASIN LEVEE DISTRICT EXECUTIVE DIRECTOR

The Southeast Louisiana Flood Protection Authority-East (SLFPA-E) is seeking qualified applicants for the position of Executive Director for the Lake Borgne Basin Levee District.

The responsibilities include but are not limited to:

- Planning, coordinating and supervising the daily operations of a levee and drainage district.
- Planning, coordination and supervising the District's emergency and recovery operations.
- Development and supervision of overall administrative structure and operations, personnel and staffing.
- Development and management of the District's budget.
- Assisting in the development and rehabilitation of flood control projects.
- Review and approval of plans for the construction of flood control projects.
- Meeting with elected and flood control agency officials, including the U.S. Army Corps of Engineers.
- Appearance before legislative committees on proposed legislation and projects.

The minimum qualifications required for this position are:

- Bachelor's degree in civil engineering from an accredited university.
- Minimum of five years experience in engineering or hydrology, or in the performance of public works functions related to flood and drainage control, floodplain management, water resources, soil conservation, land surveying, mapping, disaster response, or other related functions.
- Previous supervisory experience a plus.

Excellent salary and benefits commensurate with experience.

Please forward all resumes, with cover letter, salary requirements and references by mail to Southeast Louisiana Flood Protection Authority-East, 6508 Spanish Fort Blvd., New Orleans, LA 70124 or fax (504) 355-4120 or e-mail gboudreaux@slfpae.com.
