On the motion of Mr. Doody ,
Seconded by Mr. Barry, the following resolution was offered:

RESOLUTION #03-30-07-003 - CPRA – MASTER PLAN

“Whereas the master plan developed by the Coastal Protection and Restoration Authority is one of the most important documents affecting hurricane protection in Louisiana, and specifically in part of the region for which the Southeast Louisiana Flood Protection Authority - East is responsible, and

Whereas drafters of the master plan and critics agree that the scientific basis for certain proposals in the most recent draft has not yet been established or the engineering worked out, and

Whereas it is critical to the future of the state that these projects perform as desired, and

Whereas public comment closes April 2, 2007 and the plan goes to the state legislature soon after CPRA's April 12, 2007 meeting, and

Whereas it behooves this authority to state its position on this plan,
Resolved

That the Southeast Louisiana Flood Protection Authority - East endorses the conceptual framework laid out in this plan and urges that the final plan as presented to the legislature includes a process for outside peer review of proposed projects, and that this peer review be integrated into the planning process so as not to delay work. Further, that this Authority urges the state legislature to give maximum flexibility to the Coastal Protection and Restoration Authority so that it may continue to improve the plan, so as to best protect the citizens of, and enhance the economy, culture, and environment of, the State of Louisiana..”
